Lima, Perú
zegarra.fa11@gmail.com
+51 975 022 993

PROFESSIONAL SUMMARY

Remote Full Stack Developer with experience delivering production-ready web applications for companies in education, retail and services. Strong background in PHP (Laravel), JavaScript, Python and MySQL, with proven experience building REST APIs, dashboards, authentication systems and process automation. Focused on clean code, performance optimization and scalable solutions for international clients.

TECH STACK

Backend: PHP (Laravel), Python
Frontend: JavaScript, React, Next.js, HTML5, CSS3, TailwindCSS
Databases: MySQL
APIs: RESTful APIs, third-party integrations
Tools: Git, GitHub, GitHub Actions, Postman
Other: Authentication systems, dashboards, QR validation, process automation

EXPERIENCE

Freelance Full Stack Developer — Remote

Clients: GAF, Toulouse Lautrec, Grupo GRG, Infocap Perú, Makro

- Designed and developed full-stack web applications used in real production environments.
- Built authentication systems, admin dashboards and CRUD modules.
- Developed and consumed RESTful APIs, ensuring secure and scalable backend logic.
- Optimized database structures and backend performance.
- Automated internal workflows using Python, replacing manual Excel processes.
- Performed API testing and documentation using Postman.
- Collaborated remotely with stakeholders and non-technical users.

Backend Developer — ARASA

- Implemented electronic invoicing integration (SUNAT).
- Designed database schemas and optimized backend workflows.
- Implemented basic CI/CD using GitHub Actions.
- Improved API reliability through structured testing.

EDUCATION

Bachelor's Degree in Systems Engineering

Universidad Peruana de Ciencias Aplicadas (UPC) — In progress
